GITAM
DEEMED TO BE UNIVERSITY

Dear Hiring Manager,

It is with immense pleasure that I am writing this letter of recommendation for Mr. Mitra Boga in support of his application to pursue an internship at your esteemed organization.

I am Mr. Kondamuri Hanumantha Rao, Assistant Professor, GITAM (Deemed to be University). As Mitra's faculty, I taught him Formal Language and Automata Theory (CSEN2041). I can confidently vouch for his academic and interpersonal skills.

Mitra possesses the intellect, logical thinking, creativity, adaptability, communication, attention to detail and analytical expertise required to excel both as an individual and in a team role. It is his passion for the subject and dedication to his career that allowed him to perform incredibly well in his academics. It is commendable to perform as well as he did in a technical course such as Formal Language and Automata Theory. He participated actively during class discussions and always came to class with an open mind and positive attitude, enabling him to digest rigorous concepts.

During his time as my student, he has consistently demonstrated a knack for learning and deep curiosity in Formal Language and Automata Theory (CSEN2041). He is capable of understanding core concepts such as Deterministic and Non-Deterministic Finite Automata (DFA/NFA), ε (Epsilon) Transitions and NFA-ε Conversions, Regular Expressions and their equivalence to Finite Automata, Pumping Lemma for Regular Expressions, Equivalence and Minimization of Finite Automata, Context-Free Grammars (CFGs) and Parse Trees, Normal Forms of CFGs (Chomsky & Greibach), Pushdown Automata (PDA), Turing Machines (TM) and Universal Turing Machines (UTM), and Cocke-Younger-Kasami (CYK) Algorithm flawlessly.

As an aspiring Engineer, the internship at your organization would provide Mitra Boga with an opportunity to showcase and improve upon his academic prowess and allow you to practically experience what Mitra has learnt theoretically. I am sure he will prove to be an asset to your organization and will prove his talent in the realm of Mathematics and Engineering. I can confidently endorse Mitra's application without any reservations.
