GITAM
DEEMED TO BE UNIVERSITY

To whom it may concern,

It is with great enthusiasm that I write this letter of recommendation for Mr. Mitra Boga in support of his application for an internship/professional endeavour at your esteemed organization.

As Giddaluru Soma Sekhar, Associate Professor, School of Technology, GITAM (Deemed to be University), I had the privilege of teaching him Artificial Intelligence (CSEN1131). Throughout the course, Mitra consistently demonstrated a deep understanding of core concepts, an analytical mindset, and a relentless effort to master and apply core software engineering practices in practical projects.

What differentiates Mitra is his clarity about his future and unwavering curiosity about Engineering. He actively engages in class lectures, is well-versed in software engineering foundations and tries to implement his learning in real-world projects, excelling beyond the syllabus and demonstrating his learning. Beyond the classroom, Mitra's entrepreneurial mindset and passion for innovation are evident through his self-initiated projects as he is able to not only conceptualize theory for exams but, more importantly, apply that learning to real-world projects and open-source contributions. His Customer Churn Predictor project is a good example of following the SDLC and using SRS Documentation to operate a team and lead them to releasing a solid project with immense business impact. He even enhanced a previous project by creating 9 UML Diagrams for it, showing that he is a continuous learner, and that he implements CI/CD not only in software engineering but also in his academic learning!

During his time as my student, he has consistently demonstrated an aptitude for progression and growth. He grasps all the conceptual and applicable concepts in the course, such as SDLC, DevOps, Source Control, Software Release Process, and Software Development Process: Waterfall, Iterative, Spiral, RAD, RUP, Agile: Scrum, Prototyping, UML, Architecture, System Design, Requirement Selection, Implementation, Bugs, Testing Mechanisms: JMeter, Selenium, Risk Analysis and Planning.

I am confident that Mitra will bring the same integrity, creativity and technical excellence to any internship or professional endeavour he undertakes. I wholeheartedly recommend Mr. Mitra Boga without any reservation.

G. SomaSekhar

Dr. Giddaluru Soma Sekhar, Ph.D, Software Engineering,
Associate Professor, Department of Computer Science,
School of Technology, GITAM University,
Hyderabad, INDIA

GITAM Hyderabad (Deemed to be University)
